

Jennifer H. Fortin
from Mined Muzzle Velocity

Dear,

February

The public service industry here could use improvement. Gets dicey when it comes to counters.

There used to be electricity & water regimens. You would not know about that. My landlady reminded me of heat.

This morning I washed an apple & wanted to eat it, but bit like dirt & earth, so I opened the kitchen door to the terrace & pitched it over. Then I proceeded with the other 2. Perhaps you'll find them one day piled in sticks below, gifts, although

gifts without notes do not have quite the same impact.

The final days preceding a crucial date have a way of simultaneously muting & amplifying.

Information is learned here by word of mouth. That's how it rolls. Few of my questions are answered, but I gather flexibility & burrow passages.

Forage, Yrs.
